CDP5000B

COMPACT DIGITAL PIANO WITH CABINET

CDP5000 offers both style and playability in an affordable package. A stylish compact cabinet is perfect for home fitting and design. The hammer action keybed resembles to those on the acoustic piano, allowing young players to have proper finger practices and a smooth transition from digital piano to acoustic piano. Inspired by the rich and dynamic sound on board, young players could also develop their musical appetite and emerge themselves in the world of music. 60 songs are readily available to be played along and once the young players are ready, connect the portable music player through aux in and they could play along to their favorite tunes. Plug the piano to any PC or Mac through the USB and a world of limitless midi compatible software is available.
