14 X 4 NICKEL/COPPER HAN HAMMERED SERIES SNARE

The goal in making our new Hand Hammered Snare Drums was to employ a process that made each drum shell different from the next. Each individual drum in this series has different tonal characteristics because the hammering process produces grooves in different patterns. This process brings focus to the open tonality of 2mm Bronze, Brass and Copper shells, and delivers a sound as unique as the drummer that plays them.
