PAS-24

KNA PAS-24 AUDIO INTERFACE

PAS-24 PORTABLE AUDIO SOLUTION

The KNA PAS-24 is a high-performance, bus-powered audio interface designed for musicians, producers, and streamers who need professional-grade recording and playback in a compact, portable format.

Whether you're in the studio, on the road, or working from home, the PAS-24 delivers superior sound quality, seamless connectivity, and intuitive control—all in a device smaller than a smartphone.

KNA PAS-24 AUDIO INTERFACE

PRODUCT DETAILS

KEY FEATURES

Uncompromising Sound Quality. Built to meet industry standards, the PAS-24 records at up to 24-bit/192kHz with an internal low-jitter crystal oscillator, ensuring precise, data-loss-free conversion. Its 110dB dynamic range on input and 109dB on output captures every nuance of your performance with incredible detail.

Versatile Input Options. The PAS-24 offers two independent input channels with 1/4" TRS and XLR compatibility, allowing you to connect microphones, instruments, or line-level sources. The multi-mode preamps support Line, Mic, Hi-Z (Instrument), and Phantom Power modes, giving you the flexibility to use dynamic or condenser microphones, guitars, and other audio sources with the perfect impedance and signal strength.

Balanced Outputs and Monitoring. On the output side, the PAS-24 features dual 1/8" TRS balanced outputs, perfect for connecting studio monitors, mixers, or summing consoles. Additionally, a dedicated headphone output (1/8" TRS) ensures precise and detailed monitoring, making it ideal for tracking, mixing, or private playback.

Essential Features for Musicians and Creators. Despite its ultra-portable size, the PAS-24 is packed with features designed for seamless recording and production. Direct monitoring and loopback functions provide real-time audio tracking with zero latency, while USB mix control allows you to blend live input with DAW playback for optimal monitoring. Independent GAIN 1 & GAIN 2 controls with halo LED indicators ensure precise level adjustments, making it easy to achieve the perfect balance for any recording or live session.

Flexible Power and Connectivity. With dual USB-C ports, the PAS-24 ensures effortless integration into any workflow. One port handles data transfer, while the second provides independent power, making it fully compatible with smartphones, tablets, and other low-power devices.Drivers for Android devices can be downloaded below, while iOS devices require no drivers.
