

INDIGO 6S BK

6.5" TWO-WAY PASSIVE LOUDSPEAKER WITH FIBREGLASS CABINET (BLACK)

The Indigo 6s is a compact two-way passive loudspeaker designed to combine style, efficiency, and sound quality for venues where visual impact matters. Ideal for bars, lounges, restaurants, and VIP areas, it can operate as a standalone system in smaller spaces or as area fill in larger venues. Adding an Indigo Sub extends its low-end response, making it suitable for mid-sized venues or as supplementary sound in clubs and performance spaces.

The sculpted fibreglass enclosure features a striking high-gloss metallic finish, perfect for modern, style-conscious environments. But the design isn't just about looks: the Indigo 6s provides broad 90° x 90° dispersion and coherent sound reproduction, thanks to its point-source configuration combining a 6.5" low-frequency driver and a 1" soft dome tweeter.

With 90 dB efficiency at 1W/1m and 80 W AES power handling, the Indigo 6s is engineered for solid, smart performance wherever great sound and aesthetics go hand in hand.

HIGHLIGHTS

MODERN AND ELEGANT DESIGN IN FIBERGLASS WITH GLOSSY OR MATTE FINISH

The monocoque **reinforced fibreglass cabinet** delivers a structure that is both **lightweight and highly rigid**, ensuring long-term durability and excellent vibration control. The **sculpted design** enhances the modern aesthetic, while the choice of **smooth gloss cellulose effect** or **fine textured matte finish** makes it easy to blend into high-end environments such as boutique hotels, upscale lounges, and designer bars.

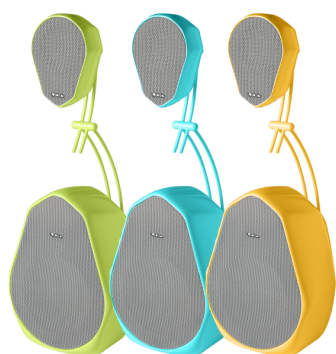

PRECISE AND NATURAL SOUND RENDERING IN A SMALL FOOTPRINT

Two-way system featuring a 6.5" woofer and 1" soft dome tweeter, precisely matched with a constant directivity waveguide—delivering smooth, detailed and natural sound dispersion, even in acoustically challenging or reverberant spaces.
