HIGHLIGHTS

PLUG IN AND GO LIVE IN SECONDS

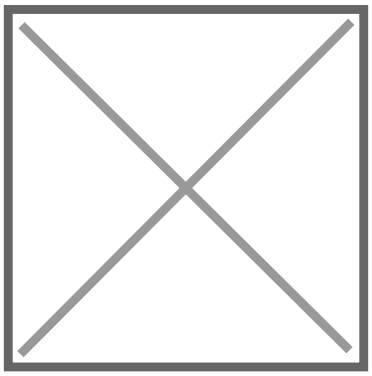

USB OTG (On-The-Go) tech changes the game when it comes to creating content. It turns your compact mixer into a powerful, flexible tool — perfect for podcasts, live streams, mobile interviews, or video content.

With USB OTG, you can hook up your mixer directly to your smartphone or tablet — no laptop or extra gear needed. Whether you're in the studio, on the road, or just out and about, you're ready to record or stream pro-quality audio in no time.

LIVE STREAMING MADE EASY

Record anytime, anywhere. With OTG, you can use XLR mics, add effects, tweak your voice, and get super clean sound — all straight from your mobile device. It's perfect for indie podcasters, YouTubers, or anyone who wants pro-level audio without lugging around a full studio setup. Post next-level content on Instagram, TikTok, YouTube, or Twitch with sound that blows your phone's built-in mic out of the water.

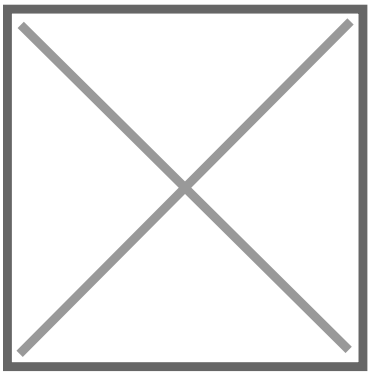

OTG is the go-to tool for streamers, vloggers, content creators, and online teachers who want to stand out. No drivers, no complicated setup — just plug your mixer into your phone with an OTG cable and you're ready to roll.

7-CHANNEL MIXER WITH DIGITAL EFFECT, PLAYER, OTG AND AUDIO INTERFACE

CHEAP EFFECTS ARE EVERYWHERE. THIS AIN'T ONE OF THEM.

Most compact mixers throw in some basic effects that sound... well, basic. Tinny reverb, lifeless delay, and cheesy presets that do more harm than good. But not this one. This little beast packs a pro-grade digital multi-effect engine - not the kind you'll want to skip over. With 88 high-quality presets, you get studio-level depth, space, and vibe that actually elevate your voice, instruments, or stream mix.

Whether you're adding warmth to a podcast voice, ambience to vocals, or just some flavor to your live stream - these effects are clean, punchy, and 100% usable. No hiss. No mud. Just real character.
