

APM-SW

SOPRANO METALLOPHONE APM-SW

The Angel APM-SW Soprano Metallophone is an educational percussion instrument designed for music education in schools and for group music activities. It produces a bright and clear sound, typical of the soprano register.

The aluminum bars are precision-crafted to provide accurate intonation and balanced resonance. It features fixed bars and removable bars to allow adaptation to different tones or educational needs.

The frame is constructed of sturdy wood, designed to ensure stability during use in the classroom. The compact and stable design makes it easy for students to use.
