APM-AW

ALTO METALLOPHONE APM-AW

This alto metallophone is an educational percussion instrument designed for school music teaching and group musical activities. It produces a bright and clear sound, characteristic of the mid-to-high register.

The carefully crafted aluminum bars ensure precise tuning and a good sound response. The instrument includes both fixed and removable bars, allowing adaptation to different tonal requirements and educational settings.

The sturdy wooden frame provides stability and long-lasting durability, making it suitable for intensive use in school environments. Its lightweight and manageable design makes it easy to transport and play, even for younger students.
