APM-BW

BASS METALLOPHONE APM-BW

This bass metallophone is an educational percussion instrument designed for school music activities. It produces a deep and warm sound typical of lower registers.

The aluminum bars are precisely crafted to offer accurate tuning and balanced resonance.
It features both fixed bars and removable bars, allowing adaptation to different keys or educational needs.

The frame is made of sturdy wood, designed to provide stability during classroom use.Its compact and stable design makes it easy for students to handle and play.

APM-BW
