MIOSTREAM6

# 6-CH MIXER WITH OTG, BLUETOOTH AND SOUNDCARD

The MioStream series was designed for creators who need a compact, reliable, and ultra-versatile tool for live audio production — whether it's streaming, podcasting, or broadcasting. If you're going live on YouTube, TikTok, or Twitch, MioStream makes it effortless: just plug in your phone, tablet, or laptop via USB or Mini-Jack TRRS and instantly record a mix of all four inputs — effects included — without any hassle.

But that's just the beginning. The built-in 48kHz audio interface features three send/return modes, allowing you to record in different configurations with zero loopback issues. It comes packed with 4 Mic/Line inputs (48V phantom power on Ch1 and Ch2; Hi-Z on Ch2), a dedicated 5V input for condenser mics, Bluetooth connectivity, and a high-quality digital effects processor with four customizable presets.

In short? MioStream6 is a powerhouse of pro-level features that makes it an essential tool for anyone serious about live audio production.

MIOSTREAM6

# 6-CH MIXER WITH OTG, BLUETOOTH AND SOUNDCARD

## HIGHLIGHTS

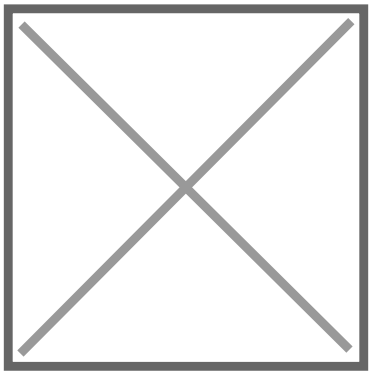

### OTG WITH USB TYPE-C AND TRRS MINI-JACK

This compact mixer is built for the next-gen creator, featuring dual **OTG connectivity** with both a USB-C port and a TRRS mini-jack input - perfect for plugging directly into your phone or tablet. With two mic inputs and a stereo line-in, it's ideal for podcasting, live music sessions, or streaming straight to your favorite apps like **Instagram** Live, **TikTok**, or **Twitch**. Whether you're jamming with friends or going solo, the OTG support means you're always ready to go live, no extra gear needed. Just connect, mix, and share your sound with the world.

### SOUND CARD WITH TYPE-C PC/PHONE HOST PORT

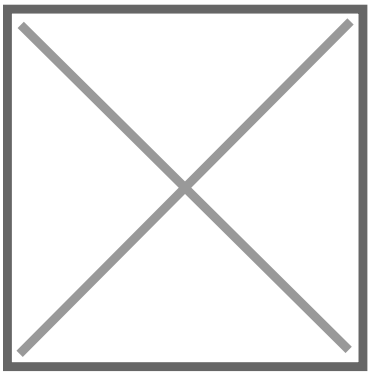

Level up your setup by combining this compact mixer - with two mic-line inputs and a stereo line-in - with a **USB audio interface** capable of recording up to **48kHz**. You can mix live mics and instruments with music from your phone or tablet via the **TRRS mini-jack** and record it in your **DAW**. Want to flip it? Play content from your **PC or Mac**, mix in vocals or instruments through the mixer, and send the full mix back to your mobile device for a clean, pro-sounding livestream. Whether you're creating, recording, or going live, this setup keeps you fully connected and in control.

MIOSTREAM6

# 6-CH MIXER WITH OTG, BLUETOOTH AND SOUNDCARD

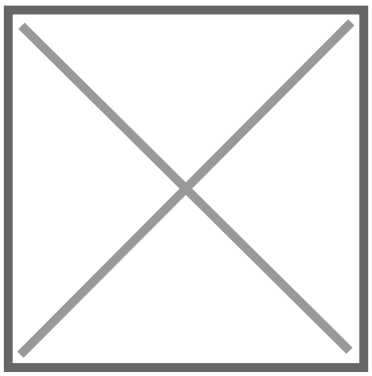

## THE MIOSTREAM SECRET: SOUND CARD WITH 3 ADVANCED MODES

Here’s what sets MioStream apart from every other compact OTG mixer out there - it’s all in the little switch next to the BT button. With it, you get to choose between **three smart recording modes**: record mic/line inputs 1 and 2 as separate mono tracks (dry), combine them into one mono track (also dry), or capture the full stereo mix—including the stereo line input and built-in FX—in one single track. Clean signals or full mix magic? You’re in control.

## DIGITAL EFFECT WITH 4 ADJUSTABLE PRESETS

Most tiny mixers out there throw in cheap, unusable effects just to tick a box - but not MioStream. This ultra-portable mixer packs a legit digital **FX engine with 4 creative presets: Hall, Plate, Room, and Echo**. Each one gives you control over key parameters - adjust reverb decay or tweak delay time - plus a dedicated level knob to dial in exactly what you need. Whether you're adding space to vocals or vibe to instruments, these effects *actually* sound good and are meant to be used, not ignored. MioStream mixers are a real tech powerhouse for web streaming, content creation, demos, and way more.
