CYC55.1W

PASSIVE COAXIAL COMPACT LOUDSPEAKER WITH 2X 5" DRIVERS, FIBREGLASS ENCLOSURE, 16 ?, IP-55 (WHITE)

The Cyclone 55 is an ultra-compact passive loudspeaker designed to deliver high fidelity and definition in both indoor and outdoor environments. With its non-resonant fibreglass construction, IP-55 weather protection, and stylish form factor, it is ideal for coastal and outdoor locations such as beach bars, resorts, cruise ships, and public areas.

Its two-way coaxial transducer configuration provides accurate directivity and phase consistency, while the wide dispersion (110° x 70°) ensures effective coverage with fewer speakers. A dedicated bracket allows for quick, secure mounting and extensive aiming flexibility.
