CUSTOM SHOP DUAL MAG II STRATOCASTER® PICKUPS, SET OF 3

Fender® Custom Shop Dual-Mag II Stratocaster® pickups produce well-balanced tone with shimmering, clear highs and rich lows courtesy of a mix of alnico magnets. Featuring unbeveled alnico 5 magnets from the low E through G and hand-beveled alnico 2 magnets for the B and high E. Additionally, each pickup is wrapped with copper shielding tape to reduce noise.

Featuring a custom stagger with a “low G” magnet that provides a smooth transition from the wound to plain strings. The alnico 5 beneath the G makes that string “sing” just right and the alnico 2 B&E magnets are slightly taller than vintage spec to help create string-to-string balance. The Dual Mag II Strat® pickup is quite faithful to its name with two magnets that give you one of the clearest, most well-balanced sounds you'll ever hear.
