DM-310H

# ALL MESH HEAD DIGITAL DRUM W/ INDPENDENT HI-HAT

Introducing the **DM-310H**: a professional-grade **All mesh head** electronic drum set featuring an **independent hi-hat**. With a **larger** ride, snare, and floor tom, it not only enhances stage presence but also optimizes layout and ergonomics—making every strike smoother and more natural. Combining excellent performance with innovative design, the DM-310H offers drummers an entirely new playing experience.

DM-310H

# ALL MESH HEAD DIGITAL DRUM W/ INDPENDENT HI-HAT

## HIGHLIGHTS

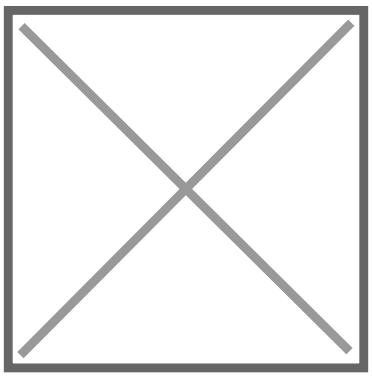

### INDEPENDENT HI-HAT

Mounted on its own stand, the hi-hat provides a far more authentic feel compared to fixed trigger pads. Equipped with a motion sensor unit, it can be easily adjusted to match your playing style, supporting fully open, fully closed, and half-open states for maximum expression.

### NATURAL TONE PROCESSING TECHNOLOGY: VARITONE™

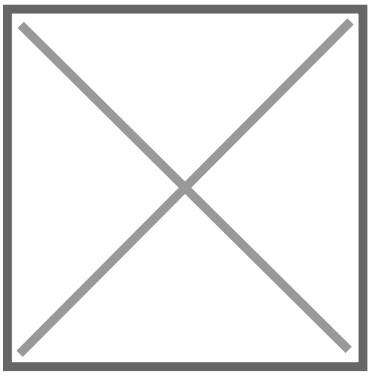

At the heart of the DM-310H is NUX's advanced **VariTone™ technology**. Powered by cutting-edge algorithms and strong processing performance, it integrates a **high-quality sound library** and precisely captures subtle differences in striking positions. The result is a **true-to-life tone** and **dynamic response**, faithfully reproducing the immersive experience of an acoustic drum kit.

## USB AUDIO I/O

With its built-in USB audio interface, the DM-310H lets you record both **audio and MIDI drum tracks** directly into your DAW. Up to **8 separate tracks** can be captured, making it an excellent choice for both studio recording and live performance setups.

## COACH FUNCTION

The DM-310H also includes a **coach function** with four different practice modes:

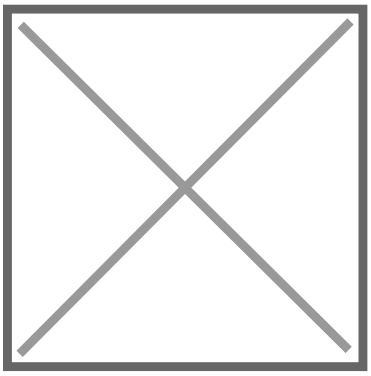

- **Accent Practice**: Improve dynamic control by shifting accents across strokes.
- **Rhythm Practice**: Train timing precision and rhythmic accuracy.
- **Silent Practice**: Internalize tempo as the metronome alternates between audible and silent beats.
- **Speed Variation Practice**: Strengthen timing consistency while adapting to gradual tempo changes.

## AUX IN RECORDING

The **AUX IN recording** feature removes the hassle of multiple device setups for mobile capture. Using a standard **3.5mm TRRS cable**, you can record high-quality **audio and video simultaneously** to your smartphone—perfect for on-the-go creation.
