SUPERSWITCH

ADVANCED FOOTSWITCH CONTROL FOR BEATBUDDY 2 AND AEROS

More than a simple footswitch, the SuperSwitch unlocks new creative possibilities with your BeatBuddy 2 and Aeros. Its proprietary design lets you trigger multiple functions at once, giving you the freedom to shape songs on the fly.

SUPERSWITCH

ADVANCED FOOTSWITCH CONTROL FOR BEATBUDDY 2 AND AEROS

HIGHLIGHTS

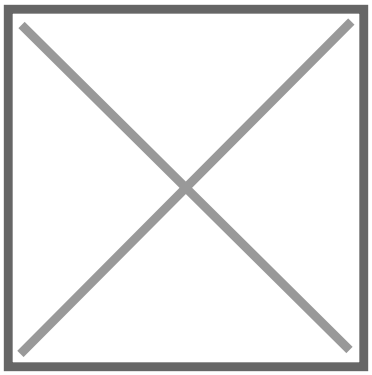

BEATBUDDY 2, SUPERCHARGED

Most multi-button controllers only let you trigger one command at a time. The SuperSwitch changes everything. Using a proprietary signal protocol, the SuperSwitch gives you simultaneous, synchronized control over multiple functions—pause and trigger an accent hit, switch parts and start a fill, all without missing a beat. You can jump directly to any song part, trigger half-time or double-time tempo, use multiple accent hits and navigate entire setlists hands free with ease.

NEXT-LEVEL CONTROL FOR AEROS

The Aeros is already a portable studio, and the SuperSwitch takes it even further. With its proprietary signal protocol, you can control overdubs, launch new loops, and switch song parts with ease. Record, mute, and unmute tracks seamlessly, jump between sections with precision, and layer full arrangements hands free—turning your setup into a true performance workstation you can take anywhere.
