FPR-CART239

2,39M FPR CART (F70PRT015)

FPR CART is an innovative element that makes it easier to assemble lighting systems and move them around a stage, mounting or removing them without having to disassemble all the luminaires. The FPR CART allows to fix and transport sections of the FPR TRUSS series. Its folding forks make it possible to reduce their height and facilitate transport and storage. These forks, adjustable in height, allow to fix the FPR TRUSS and to adapt its height to the mounted elements, whether they are spotlights, moving heads or even LED screens. The possibility of stacking several trolleys increases efficiency by optimizing space when transporting or storing them.

PRODUCT DETAILS

KEY FEATURES

- Minimum height 1195 mm / maximum 1395 mm
- Eurocodes, EN1090, EN17115
- 4 transport wheels
- Available in silver or black colors

SPECIFICATIONS

Connection type	Folding height-adjustable forks
Rectangular tube section	5 mm
Outer section telescopic legs	6 mm
Inner section telescopic legs	2 mm
External tube section	3 mm
Weight	41,07 Kg / 90.54 lbs
Maximum height	1395 mm
Minimun height	1195 mm
Length	2,39 m
Material	Aluminium
Main Tube Alloy	EN AW 6082 T6
Color	Silver
