

DICO-C100 WH

100W IP66 2-WAY SLIM COLUMN SPEAKER WHITE

The HELVIA DICO series column speakers were designed to bring together two key elements: acoustic performance and modern aesthetics.

Each model uses **50x90mm full-range drivers** with a **slim, runway-shaped profile** -equivalent to a standard 2.5" transducer - paired with **1" point-source tweeters**. This setup works like a **mini line array**, minimizing unwanted reflections from floors and ceilings. The result is **crystal-clear voice reproduction** and enhanced overall definition across the full frequency range, from **120Hz up to 20kHz**.

The longer the array, the more extended the **cylindrical sound wave** it generates - keeping sound levels consistent even at greater listening distances compared to conventional point-source systems. When paired with a **subwoofer system**, the DICO speakers deliver **deep, well-balanced lows** for a **smooth and immersive sound experience**.

Equipped with a **line transformer and a 3-position selector**, the DICO columns can easily connect to both **constant-voltage amplifiers (70V/100V)** and **low-impedance systems**. The protections on the connections and connection cables also make them **waterproof** and suitable for indoor and outdoor use, with an **IP66** protection rating.

Aesthetically, the slim and stylish profile blends seamlessly into architectural installations or modern minimalist environments. With lighter weight, compact size, and included wall-mount accessories, DICO column speakers are the perfect choice for conference rooms, worship venues, classrooms, auditoriums, and design-focused installations.

Each column comes with a wall mounting bracket with both horizontal and vertical adjustment.
