

DEKO-P256W

# PAIR OF 2.5" FULL RANGE WALL MOUNT PROJECTORS (WHITE)

Nowadays, small to medium-sized installations increasingly require maximum discretion and a refined look, even where the speakers are barely visible. This understanding is behind the creation of the HELVIA Deko-P256 series wall-mounted speakers.

These are high-performance projectors with a 2.5" full-range woofer. Program power is 25W @ 8ohm.

The housing - available in white or black - has a highly stylized design and is made of high-quality plastic. The wall-mounting bracket (included) is vertically adjustable and, since it has a round base, can be mounted by tilting it horizontally as needed. The bracket's structure is also made of high-quality plastic and allows the cable to be hidden, making it completely invisible.
