BUSKING SPEAKER

HIGHLIGHTS

LIGHTWEIGHT + POWERFUL PERFORMANCE

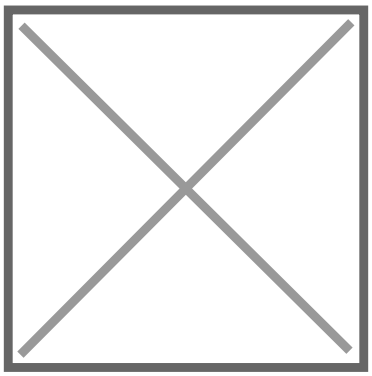

Equipped with a long-lasting lithium battery and engineered for outdoor convenience, the Busking 200FR is built for the road.

Traveling light does sound well, but it won't be a good amp without performing a convincing sound. Therefore, NUX used a lightweight ABS enclosure along with a high-quality speaker configuration of 1 × 8-inch + 2 × 3-inch drivers, delivering up to 276W of output power.

This design achieves an excellent balance between lightweight construction, high sound quality, and high power.

FULL-RANGE ACOUSTIC DESIGN

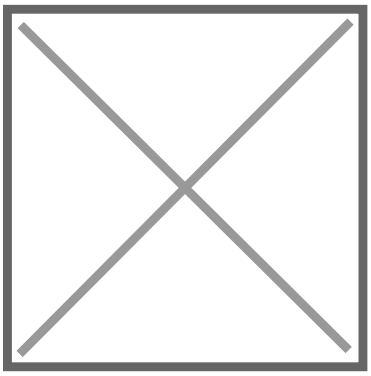

With a relatively neutral frequency response, the sound design delivers balanced performance across low, mid, and high frequencies. It avoids excessive bass boost that could cloud clarity, ensuring a clean and pleasant tone for music playback, instruments, and vocals alike.

BUSKING SPEAKER

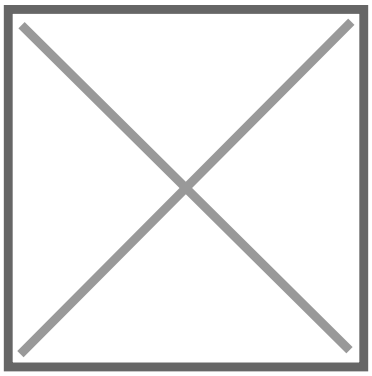

INDEPENDENT CHANNELS WITH BUILT-IN REVERB

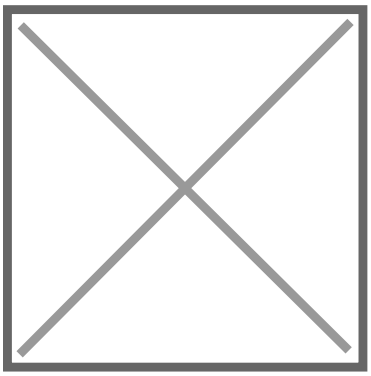

The intuitive control panel includes two fully analog input channels with independent EQ settings, along with a digital reverb effect, greatly enhancing flexibility and convenience for outdoor performances.

LIVE STREAMING & INTERNAL RECORDING

Easily connect your mobile device to enable live streaming or direct internal recording.

Tip: *Some mobile devices may require a TRRS adapter.*

HIGH-CAPACITY LITHIUM BATTERY

The built-in high-capacity lithium battery provides up to **6 hours** of continuous operation,so you can perform outdoors without worrying about running out of power.
