## 4 PORT HDMI 8K60 SPLITTER WITH AUDIO & DOWNSCALING

The Lindy 4 Port HDMI® 8K60 Splitter with Audio is a multi-function solution for distributing high quality HDMI® signals across 4 displays simultaneously from one source device, while extracting digital or analogue audio separately.

With support for resolutions up to 8K 60Hz 4:4:4 8bit, this splitter is great for creating eye-catching quad display digital signage in retail scenarios, displaying live video across four screens at event venues or distributing engaging multiscreen educational presentations at tradeshow.

The splitter also has separate optical and 3.5mm audio ports to easily extract audio from HDMI® to connect non-HDMI® amplifiers or soundbars, ideal for supporting video with immersive multichannel audio.

The splitters also features an integrated switch to downscale the input signal to 4K or Full HD, making installations with older displays hassle free while always ensuring the viewer receives the optimum picture from their display.
