# 500M CAT.6 PHONO ANALOGUE AUDIO EXTENDER

The Lindy 500m Cat.6 Phono Analogue Audio Extender is a compact solution for extending stereo audio signals to much longer distances over easily accessible network cable. With a compact pigtail style design and no requirement for additional power, the extender provides a minimalistic extension solution that can be discreetly installed alongside source devices and analogue speakers. The transceiver units provide seamless interoperability, allowing for use of either unit at any side of the setup.
