

GeoTag 12/24V

INLINE GPS TRACKER PLUS 1 YEAR OF GPS TRACKING PLATFORM SUBSCRIPTION

Mobile powered assets, like generators, distribution racks, and vehicles, often travel between sites, venues, or storage yards without clear tracking. If they go missing or get delayed, operations stall and recovery costs rise.

GeoTag 12/24V connects directly to your asset's power system for **uninterrupted GPS tracking**. Even when power is cut, its **internal backup battery** keeps sending location data for weeks, ensuring you never lose sight of your kit.

Perfect for fleet operators, rental companies, and event power suppliers, it delivers constant, automated location updates with zero need for recharging or manual setup.
