

TP110 PORTABLE DIGITAL DRUM COACH/EXTENSION PAD

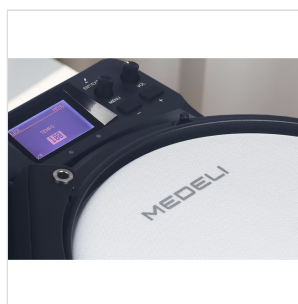

The TP110 is more than just a practice pad as it can be considered a complete training system designed to improve timing, speed, articulation and endurance for drummers of all levels.

Featuring a 10" adjustable mesh pad, 55 built-in sounds, an advanced metronome, and unique Coach exercises, it accelerates skill development like no other.

With Bluetooth connectivity, a mobile holder for online lessons, and the ability to add bass drum and cymbal pads, the TP110 goes beyond basic practice.

It can also be used to integrate acoustic/electronic drum and percussion sounds into any drum setup, making it a versatile tool for both practice and performance.

Portable, equipped with a headphone jack and powered by USB/battery, it is the ideal instrument for playing anywhere, anytime.

HIGHLIGHTS

MESH PAD

A 10" mesh pad paired with 55 dynamic drum and percussion sounds delivers a realistic and inspiring practice experience. With the adjustable mesh drum pad, you can tune the head tension to your liking, providing a personal playing feel for effective practice. The unique second-generation mesh effectively reduces the noise produced during practice sessions.

COACH MODE

There are 6 types of Coach Mode exercises uniquely designed to improve essential drumming skills at any level. The LCD displays real-time strike accuracy, as well as velocity during the Stroke Balance practice, allowing continuous monitoring and tracking of your progress.

EXPANDABILITY

The dual-trigger input can allow to add a dual-trigger pad, two single zone pads, or add a cymbal and bass drum trigger for a small drum set-up.

EASY PORTABILITY

Lightweight and compact, the TP110 is easy to carry. It supports battery power as well as power banks, making practice possible anywhere anytime.

BLUETOOTH CONNECTIVITY

By connecting to a Bluetooth device you can play along with music or learn from your favorite instructional videos (via the headphone output).
