4K PTZ CAMERA

38422

The Lindy 4K PTZ (Pan, Tilt, Zoom) camera is a high-performance solution for capturing superior quality video in a variety of conferencing or hybrid settings such as lecture theatres, boardrooms, medical suites or training facilities. With the included USB cable, the camera can be easily connected to a USB PC, Hub or extension system.

Superior 4K Clarity

Equipped with a built-in 4K dual-eye PTZ camera system, featuring a 120° panoramic lens for real-time participant detection and a 4K PTZ camera with 3x optical zoom and 110° field of view. Capture every person in the room with stunning clarity and enjoy high-quality images even when zooming in.

AI-Powered Video Conferencing Made Easy

Experience automatic AI-powered auto framing, speaker tracking, and presenter tracking. Instantly capture all meeting attendees in real-time as the system automatically adjusts to people entering or leaving the room. Built-in microphone arrays enable the camera to focus on the active speaker with dynamic close-ups, while advanced presenter tracking keeps the presenter always centered. Elevate your meetings with smart, seamless video technology.

Wired Compatibility

The USB A to C cable can easily be connected to a USB source and integrated with many popular software platforms including Zoom and Microsoft Teams for an immersive video conferencing experience.

Enhanced Conference Viewing with Dual-Lens PIP and AI Smart Gallery

Enjoy flexible picture-in-picture layouts that display both speaker/presenter and wide-angle views simultaneously perfect for medium to complex meeting spaces. AI-powered Smart Gallery technology automatically crops and highlights participants, delivering clear, individual video feeds for more engaging and effective hybrid meetings.
