ZEPHIRO V-FOG 650

VERTICAL FOG MACHINE

ZEPHIRO V-FOG 650

The **Zephiro V-Fog 650** is a compact and versatile fog machine featuring integrated multicolor LED lighting, designed to elevate stage atmospheres with perfectly synchronized light and fog effects.

Engineered for ease of use, it comes with a convenient remote control that allows seamless operation and quick selection of lighting modes. Its advanced system enhances visual impact, making it ideal for live performances, events, and entertainment venues.

The unit operates exclusively with certified, non-toxic, and non-flammable fog fluid, ensuring safe use in indoor environments. Free from open flames and hazardous residues, it represents a clean and dependable alternative to traditional pyrotechnic effects.

Built with a robust all-metal housing, the V-Fog 650 is designed to withstand the demands of stage use and touring conditions. Its internal system features a 0.8-liter fluid tank and a high-efficiency heating element, delivering a fast warm-up time of approximately 3 minutes and a consistent, reliable fog output.

VERTICAL FOG MACHINE

PRODUCT DETAILS

KEY FEATURES

- Wireless Remote Control for easy and flexible operation from a distance
- Safe and Eco-Friendly Fog using non-toxic and non-flammable fluids
- Fast Heat-Up Time ready to use in approximately 3 minutes
- Powerful Smoke Output reaching up to 3 meters for strong visual impact
- Vertical and Horizontal Fog Direction for versatile stage positioning
- LED Colors with Strobe Effects for dynamic and engaging light shows
- Durable Design with Easy Maintenance for reliable long-term use

SPECIFICATIONS

Input Voltage	AC 220–240V, 50–60Hz
Power Consumption	650W
Heat-Up Time	3 minutes
Ambient Temperature	5° – 30°C (41° – 86°F)
Fog Jet Direction	Vertical, Horizontal
Fog Projection Distance	3 meters
Control Mode	Wireless Remote Control
LEDs Type	3 × 9W RGB
Power Connectors	Europlug to VDE
Fuse	5A
Fluid Type	Non-hazardous, distilled water-based
Tank Capacity	0.8 L
