DB075

35MM ADJUSTABLE POLE WITH M20 THREADED MOUNT

This pole serves as a support for V26/V26A loudspeakers in a combined vertical configuration (when used in conjunction with the dedicated adapter bracket). Designed to ensure safe and stable placement, it allows the satellite modules to be connected directly above the V26S/V26SA subwoofer.

This pole is compatible with all loudspeakers featuring a standard 36mm hole and all subwoofers equipped with an M20 threaded hole.
