

XDJ-AN

2-CHANNEL ALL-IN-ONE DJ CONTROLLER WITH PROFESSIONAL LAYOUT AND CLOUD/STREAMING COMPATIBILITY

XDJ-AN

An all-in-one DJ system designed to create a natural transition from home DJing to club environments.

Many DJs begin their journey using DJ controllers at home, and making the transition to club-standard equipment can feel unfamiliar at first. At the same time, streaming services are becoming an increasingly important way for DJs to discover and access music. The XDJ-AN is designed to bridge this gap by making it easy to perform using multiple music sources in a familiar club-style workflow.

The XDJ-AN supports playback from USB drives, DJ applications on mobile devices and PC/Mac, and streaming services, giving you the freedom to DJ with the music sources that suit you best. With StreamingDirectPlay compatibility, you can easily access and play tracks from supported streaming services in your sets.

The system also supports rekordbox Cloud Library Sync, enabling you to synchronize tracks and playlists prepared on PC/Mac to the cloud. Using rekordbox CloudDirectPlay, you can then directly access and play tracks from your cloud-based libraries from the XDJ-AN without needing to transfer files manually.

Featuring a layout inspired by club-standard setups, including the CDJ-3000X multi player and DJM series mixers, the XDJ-AN delivers an intuitive experience that helps you feel comfortable when progressing to professional environments.

HIGHLIGHTS

ACCESS TO STREAMING SERVICES

With StreamingDirectPlay, you can access tracks from compatible streaming services directly on the XDJ-AN and mix them seamlessly with music from other sources.

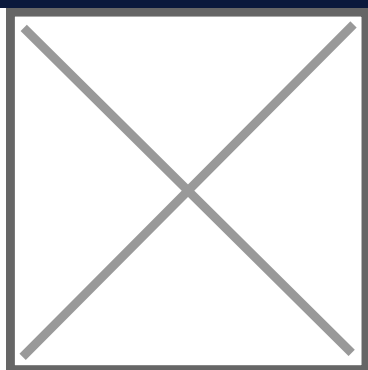

CLUB-STANDARD LAYOUT AND MEDIA COMPATIBILITY

With a layout based on the professional CDJ and DJM series gear, the XDJ-AN helps ensure a smooth transition from DJ controllers to club-standard setups. You can connect a laptop to perform with DJ software such as rekordbox for Mac/Windows, Serato DJ Lite, or djay Pro, or you can play music stored on USB drives.

XDJ-AN

2-CHANNEL ALL-IN-ONE DJ CONTROLLER WITH PROFESSIONAL LAYOUT AND CLOUD/STREAMING COMPATIBILITY

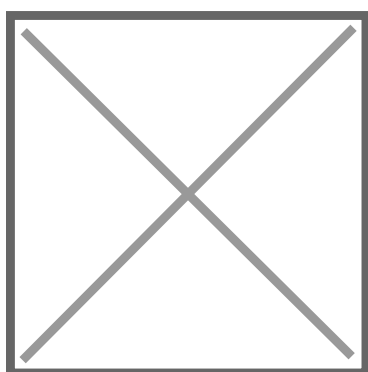

CLOUD-BASED PLAYLIST EDITING

Using Cloud Library Sync with a compatible rekordbox subscription plan, it's easy to manage your cloudbased music library directly from the XDJ-AN. The changes you make on the unit, such as adding Hot Cues and editing playlists, are automatically synchronized with the cloud.

BUILT-IN SONICLINK TRANSMITTER

Thanks to the built-in transmitter for SonicLink, AlphaTheta's ultra-lowlatency wireless audio technology, you can pair the XDJ-AN with compatible headphones and start monitoring wirelessly right away.

WORKS WITH MOBILE APPS

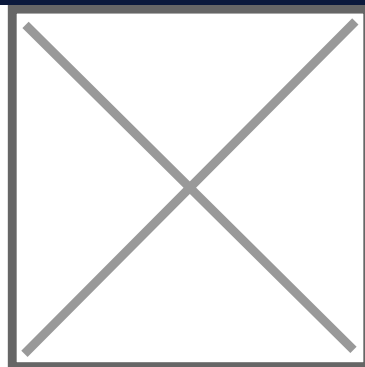

The XDJ-AN works with DJ apps such as rekordbox for iOS and djay for iOS. The unit also supports the DJM-REC app for live streaming and recording.

HIGH-QUALITY SOUND AND FLEXIBLE CONNECTIVITY

The XDJ-AN delivers clear and powerful audio at all volume levels. As well as its XLR outputs for professional equipment and RCA outputs for connecting to a wide range of audio devices, it features Bluetooth input/output for extra flexibility.
