EXP-2 EXPRESSION PEDAL, BLACK

Unlock the full potential of your Fender gear and beyond with the Fender EXP-2 Expression Pedal. Sporting separate expression and toe switch outputs, the EXP-2 is capable of controlling multiple amp and effect parameters in real time. Connect the expression output to your device to use the treadle to sweep through parameter ranges fluidly, while the integrated toe switch can be used to engage and disengage effects without the need of additional hardware. Internal compatibility switches allow the EXP-2 to adapt to your gear and the rugged aluminum chassis features a streamlined, compact design with straight edges to fit nicely on any pedalboard.
