PRO STAND P-3000/2

The Zomo Pro Stand P-3000/2 is specially designed for two Pioneer CDJ-3000. With the Zomo Pro Stand the valuable players can be placed space-saving directly above the mixer or above the turntables. Up to two players can be positioned easily and compactly on this stand. The high-quality equipment console is absolutely durable and intended for long-term use. Even mobile use is no problem.

To adapt it to your ideas, the Pro Stand P-3000/2 can be adjusted in height and inclination as well as in right-left rotation. If necessary, the position can be changed quickly and easily in just a few steps, as the most important settings can be adjusted via quick-release fasteners.

In addition, the mounting plates for the individual players are interchangeable and thus easily adaptable when changing equipment. The Zomo P-3000/2 is also very space-saving, functional and durable. The Zomo Pro Stand P-3000/2 can be mounted at the base with four screws on any table top or easily set up with the optional base plate. The combination with the base plate is especially suitable for mobile use.
