500K SPLIT SHAFT POTENTIOMETER (VOL OR TONE)

Top-quality potentiometers used on U.S. Fender® instruments. The 500K is usually associated with most guitars equipped with a humbucking pickup.

3/8" potentiometer shaft. Split shaft design. Works with push-on style knobs (no set screw).

Fits nearly all Fender instruments (U.S. and Mexico) requiring a split-shaft potentiometer.
