

SGC-1000PRO RECORDING LONG SHOTGUN MICROPHONE

Based on TAKSTAR's most advanced technology on shotgun microphones, the SGC-1000PRO is a broadcast quality shotgun microphone that successfully captures even weak directional signals across a wide frequency response range. This makes the SGC-1000PRO the perfect choice for interviews, TV, sports and outdoor broadcasting and any professional distance miking application.

SGC-1000PRO

RECORDING LONG SHOTGUN MICROPHONE

PRODUCT DETAILS

KEY FEATURES

Unmatched off-axis restraint performance enables to directionally pickup a weak sound signal in a complex environment

Advanced common mode rejection low noise amplifier features high Signal to Noise Ratio

Built-in low cut filter switch for more clear vocal sound pickup

Adopts sound pickup interference principle and long sound collecting pipe design, narrow sound pickup angle effectively eliminate the lateral ambient noise

Full metal shielding structure design features excellent RF interference resistance

Provided with portable leather bag and aluminum carrying case

Applications: interview, outdoor broadcasting, sport events and every application where it is important to capture distant sound.

The retail packages contains: Microphone, 1pc XLR-XLR Cable, 1pc Shock Mount, 1pc Windscreen, 1pc Microphone, Portable Bag, aluminium carrying Case.

SPECIFICATIONS

Product Type	Broadcasting Microphone
Polar Pattern	Hypercardioid
Driver Diameter	24mm
Output Impedance	100 ohm
Frequency Response	10Hz~25kHz
Sensitivity	-36±3dB at 1kHz
Connector	XLR M
Net Weight	268g
Color	Matte Black
