P-DJM-V10 NSE - FLIGHTCASE PIONEER DJM-V10

The Zomo Flightcase P-DJM-V10 NSE Case was developed to fit perfectly to the Pioneer DJM-V10 Mixer. The Zomo Flightcase P-DJM-V10 NSE in the popular NSE Edition is a new addition to the Zomo DJ Case range. This stylish equipment case is extremely robust to survive the exhausting tour use without damage. The particularly strong, black-lacquered aluminium profiles and very stable ball corners, which give the equipment case an absolutely high resistance, provide for elegant and professional design accents. To prevent the DJ mixer from sliding back and forth, the DJM-V10 Equipment Case is equipped with excellent internal padding, which optimally protects the equipment from damage. The Pioneer flight case is also visually stunning. The modern design in the midnight black NSE Edition is very stylish and guaranteed to be an eye-catcher. Manufactured for the roughest tour use the Zomo Equipment Flightcases are completely road- and flightproof. Thanks to the robust, laminated 9mm plywood the flightcase P-DJM-V10 NSE equipment case is extremely scratch and shock resistant and therefore armed against abrasion and cigarette burns. Comfortable butterfly snap locks hold the lid in place with unbelievable stability and make it easy to open and close. For stronger protection against theft, all NSE flight cases can be locked with an optional lock. Even if the DJ Gear is still inside the DJ Case, the bar at the front can be removed quickly and easily during the performance. We recommend the Zomo ergonomic adapter EA-1 as an optional accessory to plug in your headphones material-saving at the DJ mixer.
