

KAN200+

16X1" 2-METERS PASSIVE FLEXIBLE SPEAKER 32 OHM (BLACK COLOR)

The **Anakonda Series** is the first solution that comes to mind as it's the most revolutionary speaker in K-Array's product portfolio: is a **flexible loudspeaker line array** designed for **invisible sound systems**, **multi-zone audio**, and **architectural installations** where sound must integrate seamlessly into the environment. Its articulated structure allows the system to follow curved or irregular surfaces, making it ideal for refined spaces where aesthetics and performance must coexist.

KAN200+

It's **32 Ω impedance** allows multiple modules to be connected in parallel on a single amplifier channel, enabling the creation of long and continuous line array loudspeaker systems. **Integrated SpeakON NL4 connectors** ensure clean cabling and a discreet visual appearance, perfectly suited for architectural and design-driven installations.

HIGHLIGHTS

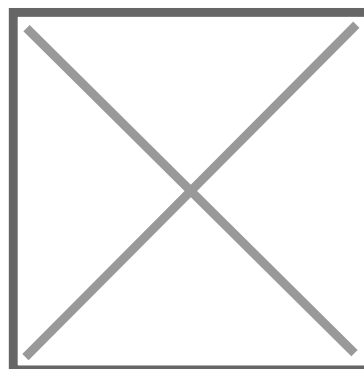

DESIGN AND PERFORMANCE IN BALANCE

Comprised of the **KAN200**, **KAN200+** and **KAN200+8**, the **Anakonda series** is designed as a **problem solver** for situations where a **traditional speaker box** can't be used, but where **excellent intelligibility**, **ultra-reliability** and a **flexible and sleek design** are required.

UNIQUE AUDIO SOLUTION

A flexo PET-grade braid exterior permits the speaker to bend into any seamless shape that you desire while protecting the 1" cone drivers foreign objects such as dust.

16X1" 2-METERS PASSIVE FLEXIBLE SPEAKER 32 OHM (BLACK COLOR)

MODULAR CAPABILITIES

Each Anakonda module is 2 meters, the loudspeaker is modular so it can create long lines of continuous clear sound. For maximum adaptability to any venue, our slim line arrays are modular when employing dedicated hardware that allows the joining of more units to reach a desired length and guarantee a perfect coverage.

PURE ARRAY TECHNOLOGY (PAT®)

This technology enables **direct, intelligible and controlled sound**, even in reverberant or complex environments, **without the need for large spaces or bulky loudspeakers**.

AVAILABLE IN BLACK AND WHITE FINISHES

Each **Anakonda** comes with a **black and a white fabric sock**, which can be used to **cover and protect the speaker** from **foreign objects** and provide the possibility to **change colors** to **match its surroundings**. **Wall brackets** are included in the **package** to make the **installation as easy and as fast as possible**, perfect for **concert front fills** and **theater under-balcony fills**.

PRODUCT DETAILS

KEY FEATURES

- Sinuous line array element
- Possible to connect with other KAN200+ elements with K-ANLINK accessory
- PVC/Neoprene, coming with black or white finish
- IP64 rating with optional dedicated waterproof accessory available for enhanced protection

SPECIFICATIONS

Type	Flexible Line Array
Transducers	16x 1" neodymium magnet woofer
Frequency Response	150 Hz - 18 kHz (-6 dB, with dedicated preset)
Max SPL	108 dB (peak, calculated using a signal with crest factor 4 [12dB] measured at 8 m then scaled at 1 m.)
Power Handling	300 W
Coverage	V. 10° H. 140°
Nominal Impedance	32 ?
Connectors	SpeakOn NL4 (1+ / 1- signal; 2+ /2- through)
IP Rating	IP64 (IP65 with IP accessories)
Dimensions (WxHxD)	2000 (±20) x 56 x 35 mm (79.5 (±0.8) x 2.2 x 1.4 in.)
Weight	1,9 kg (4.2 lb)
Material	PVC/ Neoprene

KAN200+

16X1" 2-METERS PASSIVE FLEXIBLE SPEAKER 32 OHM (BLACK COLOR)

Colors	Black / White
Marine-grade Treatment	Available cataphoresis treatment applied by electroplating for total coating against chemical and environmental corrosion
