

KX2

2" ULTRA-COMPACT PASSIVE POINT SOURCE SPEAKER, 4 OHM (BLACK COLOR)

The Dragon KX2 is an ultra-compact point source loudspeaker that balances high-output performance with an extremely discreet footprint. Unlike standard micro-speakers, it utilizes a specialized high-excursion driver developed by Powersoft that ensures exceptional efficiency and a rapid transient response. This advanced driver, supported by dual passive radiators, allows the KX2 to deliver high sound pressure levels and superior intelligibility without the distortion or weight typically found in this category. It offers integrators a precise and powerful professional audio solution that integrates seamlessly into premium architectural environments, both indoors and outdoors, where both sonic accuracy and minimal visual impact are required.

*KX2 is also available in a flush-mounted version and with marine grade protection.

HIGHLIGHTS

NEW GENERATION OF POWERFUL POINT SOURCE ELEMENTS

The Dragon family represents a powerful and compact range of point source systems featuring coaxial, triaxial and Spixel technology, combining exceptional performance with an iconic design. Engineered for sophisticated installations, these systems deliver high pressure in the near field with rapid sound attenuation over distance, making them versatile tools for installers in premium venues and refined club environments.

DRAGON-KX2: SPIXEL TECHNOLOGY

Based on an innovative full-range trasducer of 2" and engineered to deliver exceptional efficiency, remarkable low-frequency extension and impressive SPL performance. KX2 is designed for scalable array configurations and ensures precise directivity in an extremely compact format.

KX2

2" ULTRA-COMPACT PASSIVE POINT SOURCE SPEAKER, 4 OHM (BLACK COLOR)

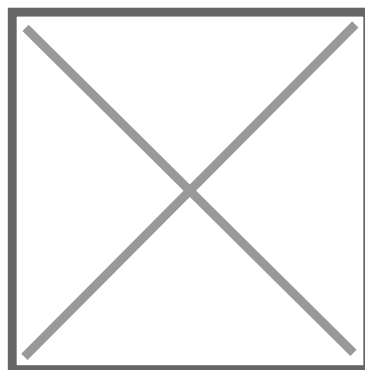

KXT: TRIAXIAL DESIGN

Featuring an advanced triaxial configuration with an additional midrange driver aligned on a single acoustic axis, the Dragon-KXT12P and KXT18P deliver true point-source performance with a minimal footprint. This innovative design eliminates phase interference to guarantee a focused, uniform sound field and exceptional vocal clarity even at high SPLs. The result is a clean, controlled sonic signature, making it the perfect solution for environments demanding high-definition audio and seamless architectural integration without compromising on power.

PRECISE AND FLEXIBLE COVERAGE

They feature a rotatable horn with fixed coverage of $60^\circ \times 40^\circ$. The enclosure design is specifically engineered to enable tight horizontal and vertical clustering. The shape and waveguide contribute to smooth acoustic coupling between units, ensuring uniform sound dispersion and consistent coverage, especially in the near field.

KX2

2" ULTRA-COMPACT PASSIVE POINT SOURCE SPEAKER, 4 OHM (BLACK COLOR)

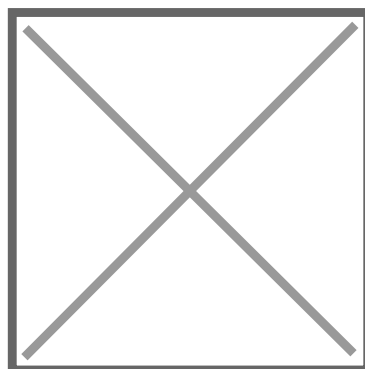

KX12 I & KX2: COMPACT FORM & EBS CONTROL

KX12 I and KX2 are compact point source systems with optimized directivity, designed for standalone use or array configurations. When used in arrays, they support EBS (Electronic Beam Steering) technology, enabling precise electronic control of dispersion. Each unit contributes to a focused, coherent coverage, minimizing reflections and ensuring consistent SPL across the listening area. This makes the KX2 ideal for applications requiring high intelligibility, accurate coverage, and clean integration. KX12 I is perfect for high SPL applications.

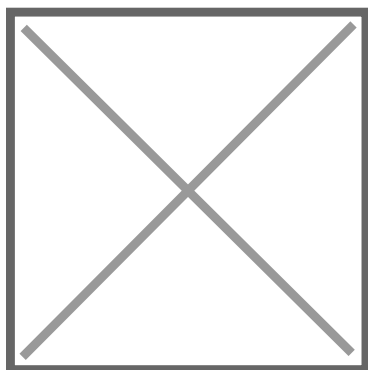

FLEXIBLE SOUND FOR EVERY SETUP

Flexible Sound for Every Setup The Dragon family of point source speakers excels in high-intensity applications, from DJ monitoring in exclusive venues to versatile near field configurations for clubs, theaters, live events and diverse applications where power and precision meets elegance.

UNIQUE STYLE OF THE DRAGON

The horn features a distinctive silver finish that sets the installation apart. With the option to cover it by a mesh grille or to leave it exposed, the design remains elegantly transparent, adding a touch of sophistication to any settings. The horn is also available in black or custom finishes, and the entire enclosure can be customized in any RAL color to suit your style.

PRODUCT DETAILS

KEY FEATURES

- High-Excursion 2.5" Powersoft® Driver and dual 2.5" Passive Radiators
- Extended frequency response from 195 Hz to 20 kHz with up to 119 dB peak SPL
- Full-range preset available
- Ultra-lightweight aluminum chassis for durability and long-term reliability.
- Recessed model available with KX2R
- White and custom finishes available upon request

SPECIFICATIONS

Type	Point Source
Transducers	1x 2.5" neodymium magnet woofer + 2x 2.5" passive radiators
Frequency Response	195 - 20 kHz (-6dB, Natural preset) / 110 - 20 kHz (-6dB, Full Range preset)
Max SPL	119 dB Half Space, Natural preset / 113 dB Half Space, Full Range (peak, calculated using a signal with crest factor 4 [12dB] measured at 8 m then scaled at 1 m.)
Coverage	V. 100° H. 100°
Nominal Impedance	4 ?
Power Handling	100 W
Connectors	2-pin Euroblock
IP Rating	IP64

KX2

2" ULTRA-COMPACT PASSIVE POINT SOURCE SPEAKER, 4 OHM (BLACK COLOR)

Dimensions (WxHxD)	72 x 151 x 72 mm (2.8 x 5.9 x 2.8 in.)
Weight	0.92 kg (2 lbs.)
Material	Aluminum
Standard Colors	Black / White
Custom colors	Available in any RAL color
Premium Metal Finishes	Not Available
Marine-grade Treatment	Available cataphoresis treatment applied by electroplating for total coating against chemical and environmental corrosion
