AMPERSTAND™ GUITAR CRADLE, BLACK

The Amperstand Guitar Cradle transforms any amplifier or tabletop into the perfect place to set your guitar down without fear that it will fall. The bottom of the Amperstand Cradle is covered in a micro-suction material that will safely grip just about any surface, including amplifier tolex, creating a secure seal that will hold the cradle in place to give you peace of mind. The Amperstand Cradle also provides a classic Fender "ashtray" to conveniently hold small items like picks and a capo or your favorite beverage. The two grooves on the sides will hold your guitar cable in place.
