ENGINE ROOM® LVL12 POWER SUPPLY

Designed to accommodate all your pedalboard needs, the Engine Room® LVL 12 is ready to deliver. Featuring twelve ground isolated power outlets, (10) are capable of delivering 9Vdc at 500mA while (2) additional outlets provide switchable voltage (9v/12v/18v) via 3-way toggle or slide switch. A courtesy IEC outlet on the back allows you to add an additional Engine Room® LVL5, LVL8, or even LVL12 for the biggest rigs.

The Engine Room® Power Supply was designed by our in-house team of experts in Southern California. The chassis is crafted from lightweight, durable anodized aluminum, and its sleek, low-profile appearance is engineered to accommodate most pedalboards. Road-tested and ready for live or studio use, Fender's Engine Room® Power Supply is built to power your performance.

ENGINE ROOM® LVL12 POWER SUPPLY

PRODUCT DETAILS

KEY FEATURES

12 ground isolated outputs – 10 outlets fixed 9Vdc at 500mA and 2 outlets with switchable voltage (9v/12v/18v)

Global mains input voltage (100-240Vac) 50/60Hz for use anywhere in the world

Standard IEC mains voltage connector

Dimensions: Width: 11.1" (282mm), Height: 1.65" (42mm), Depth: 3.66" (93mm)

Cable kit included 6 x 2.1mm barrel connector 24" (60cm) length 4 x 2.1mm barrel connector 18" (45cm) length 2 x 2.1mm barrel connector 12" (30cm) length 1 x 2.5mm to 2.1mm barrel 1 x 2.5mm to 2.1mm barrel reverse polarity 1 x 3.5mm TS to 2.1mm barrel 1 x 9V Battery clip to 2.1mm barrel 1x IEC daisy-chain cable (male to female)

Material: Anodized Aluminum
