NOD-1 HORSEMAN 20th ANNIVERSARY

DUAL OVERDRIVE (20TH ANNIVERSARY EDITION)

A New Icon for a Milestone Year. 2026 marks 20 years of NUX innovation and the auspicious Year of the Horse. To honor this double celebration, NUX have reimagined our iconic Horseman with a bold, exclusive aesthetic. Combining the legendary ‘Gold Centaur’ soul with a design that captures the power and grace of the horse, this 20th-anniversary edition is a must-have for collectors and tone-chasers alike.

NUX Horseman pays homage to the legendary Centaur pedal. There are 3 dials for primary settings and 2 modes: Gold and Silver, and it offers massive headway usually requiring an 18v input. Gold Mode mimics its classic predecessor; the transparent Gold Centaur overdrive pedal and the Silver Mode is a powered-up version with an extended gain range (Silver Centaur).
