MONO-STICK HD-120 NSE PROFESSIONAL SINGLE-EAR DJ HEADPHONE

0030103573

For quick monitoring in the booth, the Zomo Mono-Stick HD-120 NSE relies on a consistently practical **single-ear concept**. The compact mono-stick headphone in the **NSE Black Edition** delivers the signal directly and clearly to one ear, while you keep an eye on your surroundings at all times. This makes the model particularly suitable for loud, dynamic working environments where orientation, speed, and secure access to the mix are essential.

In use, the headphones impress with **kick-bass optimisation**, which, combined with the high efficiency, ensures a stable and precise perception. Especially in high ambient noise, the signal remains easily audible without the need for constant readjustment. The wide frequency response supports both punchy rhythmic components and finer details in the sound image.

The **swivelling ear cup** is a practical advantage for everyday work. It facilitates a quick switch between the cue signal and the environment without interrupting the workflow. This is complemented by the ergonomically shaped handle, which sits securely in the hand and keeps operation comfortable even over longer periods. This ensures the hand-held headphone remains direct, controlled, and easy to use.

The product is also well-thought-out in terms of freedom of movement. The **detachable coiled cable** with robust connectors provides more flexibility at your setup and supports a tidy, resilient operation. Furthermore, the solid construction and the interchangeable pads made of synthetic leather and velour ensure a longer service life, allowing you to choose comfort and feel according to your needs. A transport bag is a useful addition to the scope of delivery and protects the Zomo HD-120 NSE during transport.

***The package includes:**

-1x Zomo HD-120 NSE

-1x Coiled cable 3 metres XLR to 6.3 mm

-1x Adapter 6.3 mm jack to 3.5 mm jack
