DJM-A7

4-CHANNEL PERFORMANCE DJ MIXER

DJM-A7

Meet the DJM-A7, AlphaTheta's new 4-channel performance DJ mixer designed for a wide range of venues and environments.

As DJs play in more places than ever before – including small clubs, bars, restaurants, and even hotels – many venues need a mixer that works for different types of events. And because they use a diverse array of software and devices when performing, there's a growing demand among DJs for mixers that can support various setup styles. But where can they find such versatility and professional quality when working with limited space and budget? The answer is the DJM-A7.

This new 4-channel mixer offers compatibility with a huge range of DJ software and devices, plus a smooth setup process every time. Inheriting the usability of the flagship DJM-A9, the DJM-A7 features 2 USB Type-C ports for PC/Mac and mobile device connections. This enables fast DJ changeovers and smooth operation, even in tight booths or at venues with a rotating lineup of artists.

Using the new industry-first Master Texture feature, DJs or venue managers can easily tune the mixer's sound to suit the acoustics of the room, the genre of music being played, or the time of day, without needing the help of a sound engineer. The mixer also features 4 Sound Color FX, including the new Split Filter which shapes the midrange frequencies while keeping the groove of the track rolling. And with illuminated FX SELECT buttons in the Beat FX, you can quickly choose the effect you want, even in a low-lit booth, and bring it into your performance at just the right moment.

HIGHLIGHTS

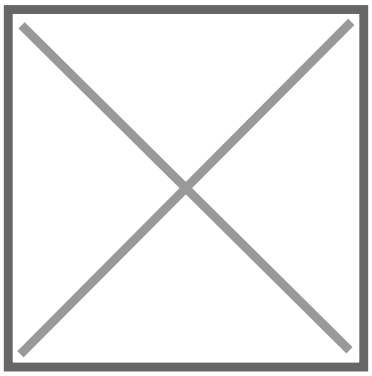

LINK CUE

When connected to PRO DJ LINK-compatible multi players, the DJM-A7 supports Link Cue, letting you listen to an unloaded track, or a different playback position of a track that’s playing, through your headphones.

SONICLINK

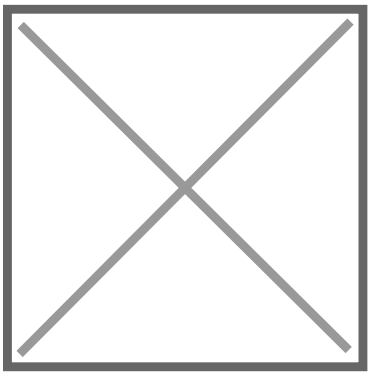

With built-in SonicLink ultra-low-latency wireless technology, you can enjoy the freedom of wireless monitoring when you use compatible headphones. The DJM-A7 also supports SonicLink Touch Pairing with the HDJ-F9.

4-CHANNEL PERFORMANCE DJ MIXER

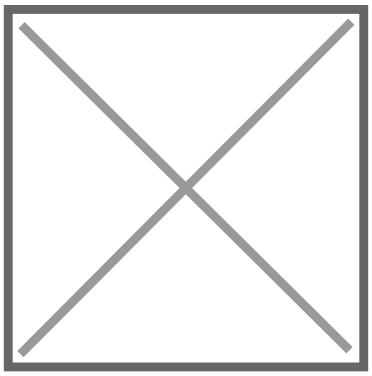

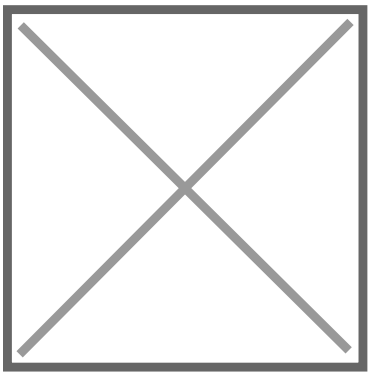

EVOLVED MIXING AND EFFECT FEATURES

The DJM-A7 adopts the same 45 mm channel faders as the DJM-A9 and it features the Soft Mix Curve fader curve mode, which enables smoother, more natural-sounding mixes. With Sound Color FX and Beat FX, there's a host of creative possibilities at your fingertips.

MASTER TEXTURE

Using the new Master Texture, you can easily adjust the sound coming from the speakers so it's tuned for the physical environment and the atmosphere you want to create – without needing a sound engineer.

CLEAR SOUND QUALITY

Inheriting the clear sound quality that earned the flagship DJM-A9 high praise, the DJM-A7 features neutral tuning that delivers balanced sound across a wide range of music genres.
