3-SADDLE TOP-LOAD/STRING-TROUGH TELE® BRIDGE WITH COMPENSATED BRASS “BULLET” SADDLES

The top-load/string-through Telecaster bridge with compensated “bullet” saddles is our most comfortable, flexible Tele bridge yet – retaining classic brass-saddle tone and providing excellent intonation and flexible setup options, allowing you to tailor the tension and tone of each string to your liking. The compensated “bullet” brass barrel saddles are rounded off on the sides for comfort while providing accurate intonation and vintage-informed tone. Strings can be top-loaded for reduced tension, resulting in a mellower twang and springy attack that's perfect for rock n roll.
