

PARTYPLUG-MKII-TR UNIQUE EARPLUGS FOR MUSIC CONCERTS AND EVENTS TRANSPARENT EDITION

A concert, a nightclub, a festival, or a performance by your favourite band. You are well prepared with Alpine PartyPlugs. We developed these earplugs especially for music lovers who want to protect their ears against excessive noise levels conveniently. At the end of an enjoyable night out, many people experience an irritating ringing in their ears. Loud music and shouting into one another's ears to be heard takes its toll. Your ears are overburdened and require a great deal of rest. If this happens frequently, you risk permanent damage to your hearing and a continuous buzzing in your ears. Fortunately, Alpine PartyPlug earplugs protect your ears. Twenty years of experience have allowed Alpine to develop a perfect new earplug model. The extremely well thought-out and extensively tested shape of the earplugs, provides a natural flat absorption and a great fit.
