

## 1980100300 351 SHAPE, MATERIAL MEDLEY, MEDIUM, (6)

Fender® picks provide comfort and high-performance flexibility for every performer, with a variety of classic and contemporary materials to suit the playing styles and preferences of every guitarist.

The traditional 351 shape, our most popular pick design, is a perfect accessory for players of versatile styles and techniques. This six-pack of picks contains one crafted from various Fender materials: Celluloid, Tortuga, Nylon and Dura-Tone<sup>™</sup>, along with a Wavelength<sup>™</sup> pick.

**Celluloid:** Celulloid picks offer traditional playing feel and warm, round musical tone.

**Tortuga:** Crafted from Ultem®, Tortuga picks produce a slightly warmer tone than their pure Ultem counterparts.

**Wavelength:** A pragmatic twist on traditional pick design, Wavelength picks sport debossed impressions on both sides.

**Nylon:** These U.S.-made-made nylon picks offer an improved nonslip, tactile gripping surface.

**Dura-Tone:** Long-lasting and durable, Delrin® has a stiffer feel than celluloid, giving a strong, well-defined attack to every stroke.
