

SLUDGE HAMMER

FUZZ - HANDCRAFTED BOUTIQUE STOMPBOX

Stoner Metal, Doom, Sludge. The Sludge Hammer is built to deliver the unearthly tones that are identified with these three subgenres. Instead of trying to emulate a classic amp, Greenhouse designed a pedal that covers a lot of ground and enables you to dial your own tone using your amp. Whether it is a solid state combo or a big tube amp, the Sludge hammer will turn the clean channel of an amp into a formidable riff-worthy beast. Gain ranges from medium gain crunch up to an uncompromising wall of sound. At higher gain settings the distortion gets slightly loose and fuzzy.

PRODUCT DETAILS
