FENDER PICK CHUGG™ 351, 6 PACK

Digg in! The Fender Chugg™ picks are made of 1.5mm thick, highly polished cellulose acetate that mimics the sound of real tortoiseshell. A precision cut double bevel at the tip creates a slightly broken-in feel that your go-to pick develops over time. This reverse beveling also allows the pick to bounce quickly from string to string, making Fender Chugg picks work for a multitude of flatpicking styles. A textured logo on both sides will ensure a more stable grip on your new favorite plectrum.
