## MP-2 MIGHTY PLUG
# REMOTE MODELLING AMPLUG FOR GUITAR AND BASS

Mighty Plug is a handy silent-play gear for both guitarists and bassists, featuring various effects, modeling amplifiers, and Impulse Response (IR) cabinet models. With built-in acoustic guitar IR models and acoustic amps, you can play regular electric guitar to simulate acoustic guitar. The embedded Drum patterns can let you play along with your favorite music styles. To remote Mighty Plug with a smartphone or tablet via Bluetooth connection, you can install the MIGHTY AMP application (free). Believe it or not, it's all in there!
