

CB-BLK-VN 4/4

CARBON FIBER BOW FOR 4/4 VIOLIN

During the recent years, carbon fiber bows became widely popular. The reason is that they offer similar functionality of those in pernambuco wood, but at a sharply lower cost. Lightweight, balance and easy playing, as well as the produced sound, are essentially the same. Other than the cost, the carbon fiber offer other relevant advantages. They are more resistant and they essentially last longer. Bottom line, CB-BLK bow is a great choice for both students and professionals.
