KEY RING WITH MACASSAR EBONY WOOD PICK

All the magnificence of the colourful Timber Tones in key ring form. In addition to looking good, they give a good grip to your bunch of keys and introduce you as a guitarist of great taste to the eyes of the world. We all know a guitarist who claims good plectrums are not worth it because he/she loses them on a regular basis. Well now that your keys are attached to it, you have no excuse! And you better watch out. Although Macassar Ebony is very similar in hardness to African Ebony, it is a much more open grained material. This grain pattern is usually obvious on the surface of the plectrums and affords much more grip. If used on an acoustic guitar it will dramatically brighten the sound.
