STRING INSTRUMENTS

Toledo

Toledo EUROPA is a brand new series of classic guitars entirely made in Europe. Material choice, craftsmanship, varnishing and set up: each step is made with the purpose of creating high value instruments.

Woods, carefully selected and stocked in climatized chambers to grant the perfect humidity and temperature in each phase of the process, are crafted with traditional luthiers techniques fully supported by modern technologies.

Wood and finishes

All EUROPA series feature solid cedar/spruce tops, while back and sides are made in Indian rosewood, mahogany or beech. These woods are used in different combinations both in luxury glossy and elegant open pore satin finishes, bringing to life a complete array of instruments including classical and flamenco guitars.

Full respect for the environment

Each guitar is sold with its own origin certificate in compliance to the latest CITES regulation on rosewood (where used).

ZEUS II H-5000QX - 4 x 800W @ 8ohm - 4 x 1200W @ 4ohm Class-H 4-Channel Professional Power Amplifier

ZEUS II H-QX Amplifier series is ideal for professional multi-channel applications with power ratings between 400W and 800W RMS @ 8ohm per channel. It is a 4-channel Class-H line (H2600-QX is Class-AB) with excellent sound and maximum reliability. It is possible to use in Stereo, Parallel and Bridge mode (CH1-2 / CH3-4). Each channel integrates a crossover with low/high-pass filter, for use with both full-range systems and subwoofers, without the need for external processors. The protection system includes, in addition to the signal limiter, on-off muting, DC-offset detection, thermal protection, and current limiting. The cooling system is extremely efficient and controls the speed of the two fans, to ensure excellent noise reduction. ZEUS II H-QX amplifiers are, therefore, absolutely stable, reliable in any situation of use and offer a really interesting value for money.

AUDIO PROCESSORS

The Digital Audio Processors of DCX NET series (DCX-240 NET, DCX-260 NET, DCX- 480 NET) are powerful DSP based audio processors, ideally suited for install applications, where they combine the functions of a multitude of conventional products in a compact 1U unit with extensive remote control capabilities and Ethernet functions. To achieve this, the units have up to four inputs and eight outputs which can be configured in a selection of basic crossover modes – 4 x 2 way; 2 x 3 way + 2 Aux; 2 x 4 way; and 1 x 8 way (as applicable to i/o configurations). They also offer a “free assign” mode, which allows completely flexible routing of any output from any combination of inputs. Each input has a gain control, variable delay, eight bands of fully parametric equalization. The parametric filter bands have a large selection of different filter types available, including shelving, notch, band-pass, phase and elliptical behaviors. Each output has a gain control, variable delay, high and low pass crossover filters, 8 bands of fully parametric equalization, polarity switching and, additionally, a fully featured limiter, and a final clip limiter. The crossover filters offer slopes of up to 48dB/Octave, with a variety of responses available. Remote control is catered for in the form of Ethernet by TCP/IP and RS485 ports, and multiple user memories are provided for the storage and recall of settings.
