# AU-HD300T

USB/XLR DYNAMIC DESKTOP MICROPHONE AU-HD300T

The AU-HD300T Dual-Mode Dynamic Microphone is a brand new microphone product offering USB and XLR connectivity. With the high sampling rate of the USB digital connection, users can easily connect to Windows and MacOS systems. The AU-HD300T microphone is ideal for podcasts, streaming, interviews and other digital recordings. The XLR connection allows you to connect the microphone to amplifiers and mixers to meet professional needs such as music recording and sound production. Both outputs can be used simultaneously for added versatility. AU-HD300T offers real-time monitoring via headphone output and audio playback in USB mode. The volume can be easily adjusted using the appropriate buttons located on the microphone.

Status: New
